

TRACKING

FULLY AUTOMATED VIDEO PODCASTING

CAPTURE YOUR PRESENTATIONS WITHOUT AN OPERATOR

VARIOUS PRESETS FOR A DYNAMIC VIDEO PRODUCTION

2 × PTZ HD-SDI CAMERAS

No need for specific cameras, TRACKING is based on a real time video analysis and AI. Compliant with all PTZ cameras (Sony, Panasonic, Lumens...)

AUTOMATIC NEW SLIDE DETECTION

DVI-I INPUT

New slide detection during live presentation. AI engine switches between cameras and adjusts shots to select the best possible view

A QUALITY PRODUCTION WITHOUT ANY HUMAN INTERVENTION

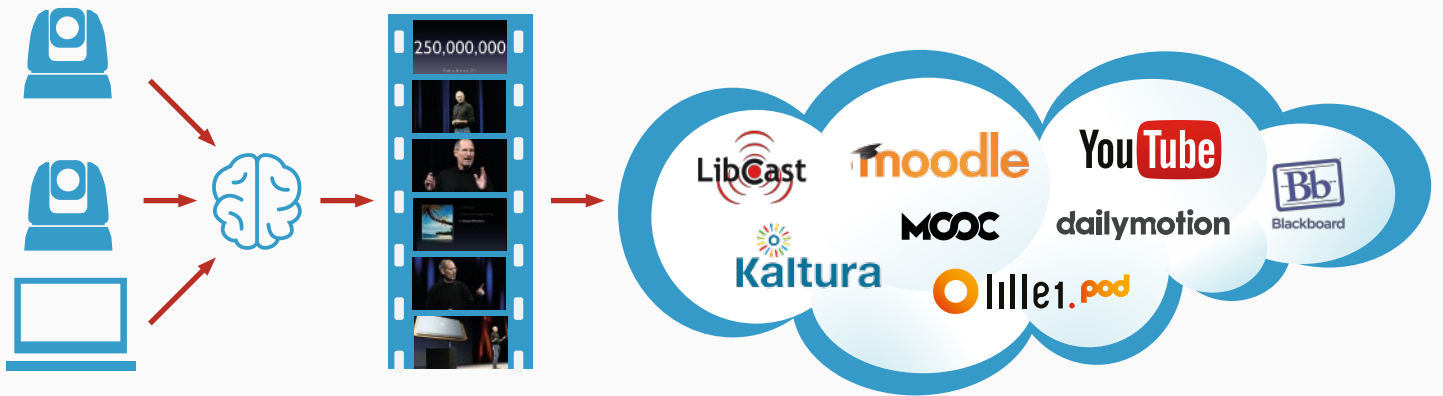

AI SOFTWARE ENGINE EMBEDDED

Detection of speaker's movements and changing slides. The AI engine take the right production decisions in real time.

FULLY AUTOMATED CONTENT PRODUCTION

FOR LIVE RECORDING AND PODCASTING

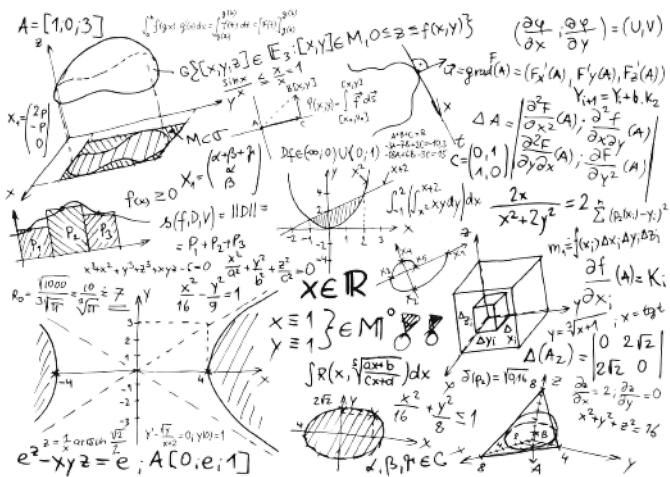

TRACKING BY MULTICAM

The majority of tracking systems simply follow the speaker.

Multicam's algorithm detects the position of the speaker and anticipates the speaker's movements to choose the most suitable camera shot.

The system seamlessly combines cameras and the presentation using the slide detection module.

WANT TO TAKE CONTROL?

YOU CAN SWITCH ANY TIME BETWEEN SEMI AUTO OR MANUAL MODE
